- ELECTRONIC WATERMARK COMPOSITING DEVICE AND IMAGE ALTERATION DECIDING DEVICE

- PROBLEM TO BE SOLVED: To composite an electronic watermark with an image photographed by an order receiver based on the request of an orderer by compositing cipher information which is prepared by enciphering image identification information for identifying an input image with the image as an electronic watermark, recording it and reporting a method thereof and the image identification information.
 - SOLUTION: A method for extracting the electronic watermark composited with an image 10, a method for deciphering the cipher information to be used as electronic watermark and the image identification information of the image 10 to be used for preparing the cipher information are reported by the manager of a laboratory system to the user of an image alteration discriminating device 90, namely, to the orderer. The order receiver receives a recording medium such as CD-ROM storing a composited image 11 from a laboratory system, selects a required image out of recorded images and presents it to the orderer as photograph data for proving progress. In order to discriminate whether an image 12 presented by the order receiver is altered, the orderer uses the image alteration discriminating device 90.

- AB JP2001078013 NOVELTY The encryption section encrypts
 discriminative information of input image. Synthesis section
 synthesizes encrypted information as an electronic watermark in the
 image. Recording unit (40) records synthesized image. Notice
 section notifies extraction method of watermark and decoding
 procedure of encrypted information.
 - DETAILED DESCRIPTION An INDEPENDENT CLAIM is also included for image alteration judging apparatus.
 - USE Used in worksite by bidder of construction who takes photograph of worksite for every stage of construction to synthesize electronic watermark in photographed image.
 - ADVANTAGE Electronic watermark is synthesized in photographed image, clearly and easily.
 - DESCRIPTION OF DRAWING(S) The figure shows the block diagram of electronic watermark synthesis apparatus. (The drawing includes non-English language text).
 - Recording unit 40
